#### MESSAGE

The National Education Policy 2020 has most aptly pointed out that the ability to read and write, and perform basic operations with numbers, is a necessary foundation and an indispensable prerequisite for all future schooling and lifelong learning. The highest priority has therefore been awarded to achieving universal foundational literacy and numeracy at the end of Grade III, by 2026-27 through a National Mission i.e., the National Initiative for Proficiency in Reading with Understanding and Numeracy (NIPUN Bharat).

As a crucial step towards strengthening efforts for Foundational Literacy and Numeracy, the Ministry of Education has conducted a large scale nationwide Foundational Learning Study (FLS) in collaboration with the National Council of Educational Research and Training (NCERT) during March, 2022. The study is first of its kind in the world as it aims to set-up benchmarks for reading with comprehension in 20 Indian languages. More importantly, FLS will also provide data to report on Sustainable Development Goal (SDG) 4.1.1 indicators at the global level.

With great pride, I would like to underline the fact that this Foundational Learning Study is the largest one-on-one study with a sample size of 85000+ Grade 3 students. This is also the first time the policy linking method for setting global benchmarks has been implemented on one-on-one numeracy assessments.

I would like to take this opportunity to congratulate all partners who were involved in conceptualization and implementation of this critical study. The first hand inferences of learning levels of students in the foundational stage drawn from the Foundational Learning Study will go a long way towards establishing Foundational Literacy and Numeracy as an essential pre-requisite to learning.

I extend my best wishes to all stakeholders who would be involved in this tremendous task of translating the vision of NEP 2020 for achieving universal Foundational Literacy and Numeracy.

(Dharmendra Pradhan)

#### MESSAGE

Attaining foundational literacy and numeracy for all children has been accorded utmost importance by the National Education Policy 2020. As a first step, the Department of School Education & Literacy has set up a National Mission for universalization of Foundational Literacy and Numeracy called National Initiative for Proficiency in Reading with Understanding and Numeracy (NIPUN Bharat). The Mission aims to ensure that all children by the end of grade 3 achieve foundational learning standards by the year 2026-27.

Following the Mission mandate, the Ministry in collaboration with the National Council of Educational Research and Training (NCERT) has conducted a large scale Foundational Learning Study (FLS) in March, 2022. FLS covered Grade 3 students and aims to benchmark Foundational Literacy and Numeracy in 20 Indian languages, which will enable to track the progress of a child.

As this Foundational Learning Study provides insights into the learning level in Foundational Literacy and Numeracy skills, the interventions and the follow up steps will result in overall improvement in the system to provide required foundational literacy and numeracy skills to the learners.

I would like to extend my appreciation to the team who conducted this crucial study and convey my best wishes to all stakeholders who are involved in the mammoth task of attaining Foundational Literacy and Numeracy in consonance with the vision of NEP 2020.

Ampune

#### Message

Early years of development of a young child is a period of rapid brain development. Research also indicates that 80-90 percent of the brain develops by the time a child is 6-7 years old. That is why the focus on building the strong foundation for better growth, development and learning in early years becomes one of the most important indicators for the development of a productive and efficient human capital. The National Education Policy, 2020 has also accorded the highest importance to the achievement of foundational literacy and numeracy skills and categorically recognizes that the rest of this policy will become relevant for our children only if this most basic learning requirement is first achieved.

Towards this end, a National Mission on Foundational Literacy and Numeracy known as NIPUN Bharat (National Initiative for Proficiency in Reading with Understanding and Numeracy) has been launched. The focus is on creating an enabling environment for ensuring universal acquisition of foundational literacy and numeracy, so that every child achieves the desired learning competencies in reading, writing and numeracy at the end of Grade III.

In keeping with this goal, we were able to conduct the largest one-on-one Foundational Learning Study in collaboration with other likeminded partners to establish reading proficiency benchmarks for fluency and comprehension in 20 Indian languages and proficiency benchmarks for numeracy. For the first time, policy linking method for setting global benchmarks has also been implemented on one-on-one numeracy assessments. Hence, the study aims to provide reliable, valid and comparable data that can be used to monitor the performance of the system in giving children a robust foundational education.

It gives me great pleasure to share the FLS report with all of you and to partner you in this incredible task ahead to achieve universal acquisition of foundational literacy and numeracy skills at the primary level.

nita Karwal)

# **About FLS**

Ministry of Education launched the National Initiative for Proficiency in Reading with Understanding and Numeracy (NIPUN) Bharat in July 2021. NIPUN was announced as a national mission to enable all children at the end of Grade 3 to attain foundational skills by the year 2026-2027. As a crucial step towards strengthening efforts for Foundational Literacy and Numeracy (FLN), a large-scale Foundational Learning Study (FLS) has been undertaken by National Council of Educational Research and Training (NCERT) in March 2022.

#### **Objectives of the study**

Assess learning outcomes: The study aims to provide reliable and valid data about Grade 3 students to know what they are able to do in foundational literacy and numeracy and the extent of learning outcomes being achieved.

Set baseline for NIPUN: The data derived from the FLS Study would help in establishing a baseline for the NIPUN Bharat mission.

Set benchmarks: The Study also aims to establish reading proficiency benchmarks for fluency and comprehension for each of the languages (20 in number) being assessed under the study and proficiency benchmarks for numeracy.

Report on SDG: This study will also provide data to report on SDG 4.1.1 indicators at the global level.

#### **Coverage of the Study and Sample**

Approx. 86,000 grade 3 students from 10,000 schools were covered. The Study sample included state government schools, government aided schools, private recognised and central government schools.

FLS was conducted in 20 languages which are being used as a medium of instruction in various state/UTs covering - Assamese, Bengali, English, Gujarati, Hindi, Kannada, Malayalam, Manipuri, Marathi, Mizo, Odia, Punjabi, Tamil, Telugu, Urdu, Bodo, Garo, Khasi, Konkani and Nepali.

#### **Study Methodology**

The FLS Study is a school-based performance assessment. Selected sample of children from grade 3 were assessed by a test administrator in a one-on-one setting where each child responded to a set of questions administered orally.

Several foundational literacy skills including oral language comprehension, phonological awareness, decoding, reading comprehension, oral reading fluency with comprehension were assessed as part of assessment. For foundational numeracy, number identification & comparison, number operations, multiplication and division facts, measurement, fractions, patterns, and data handling are included.

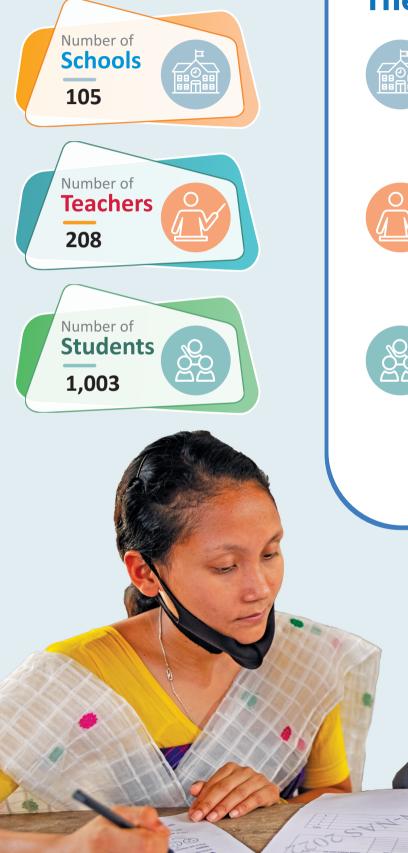

#### **Study Achievements**

Psychometric analysis of the data has been carried out. Benchmarks for oral reading fluency and comprehension in 20 languages and benchmarks for numeracy have been established.

A policy linking methodology has been implemented for the first time to arrive at the benchmarks in literacy and numeracy under the FLS 2022. Foundational Learning Study 2022 is the largest study that assessed the learning levels of more than 86,000 students across India and is the only study that has been conducted in 20 different languages.

## Foundational Learning Study 2022 Languages Assessed in the State/UT

## **Puducherry**

## **Foundational Literacy**

Foundational Literacy comprises of the ability of reading, writing and communicating in a particular language. In the Foundational Learning Study, foundational literacy has been assessed through different sub-tasks as explained below:

#### Subtasks Assessed in Foundational Literacy

Subtask	Description of the subtask
Oral Language Comprehension	Listening to 5 different texts (Comprising 1 sentence, 2 sentences and 3 sentences) and matching the content of each of the texts with the given pictures.
Phonological awareness	The task was based on identifying the initial and final sounds in 12 grade level words
Decoding Letters	Reading aloud 100 individual (but repeated) letters and syllables of a particular language presented in the form of a grid
Decoding Words	Reading aloud 50 distinct grade level words
Decoding Non-words	Reading aloud 50 distinct grade level words
Picture Matching	Reading 5 different texts (Comprising 1 sentence, 2 sentences and 3 sentences) and matching the content of each of the texts with the given pictures
Oral Reading Fluency (ORF) and comprehension	Reading aloud two grade appropriate short stories and answering questions related to retrieval and inferences.

## Oral Language Comprehension

The ability to understand the meaning of language (through spoken stories or pictures)

The task comprised of listening to different texts (Comprising 1 sentence, 2 sentences and 3 sentences) and matching the content of each of the texts with the given pictures.

#### Percentage of Students

Descriptor		National Average Performance (%)
Listens and Comprehends four to five texts of varying lengths correctly	86	85

## Average Score in Oral language Comprehension

(on a scale of 0 to 5)

## Phonological Awareness

The ability to identify sounds within a given word

The task was based on identifying the initial and final sounds in grade level words

## Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Correctly identifies at least one initial sound in grade level words	97	95
Correctly identifies at least one final sound in grade level words	94	93
Not able to identify the initial sound and final sound in any of the given grade level words	3	4

## Average Score in Identification of Initial and Final Sound of a Word (on a scale of 0 to 12)

#### Decoding Letters

The ability to sound out the symbols (akshara or letters)

The task comprised of reading aloud letters and syllables of a particular language.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Reads 80-100 letters correctly and fluently	93	95
Reads 50-79 letters correctly/reads some letters with self correction	4	3
Reads 10-49 letters correctly/hesitantly with self correction	2	2
Reads less than 10 letters correctly/hesitantly with self correction	1	1

#### Average Score in Identification of Symbol-Sound Correspondence (on a scale of 0 to 100)

#### Decoding Words

The ability to sound out gradelevel real words The task was based on reading aloud 50 grade level words.

On average students can read 33 words correctly.

## Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Reads 80% and more words correctly and fluently	50	73
Reads 50% to Less than 80% words correctly (with self correction wherever needed)	21	13
eads 10% to less than 50% words correctly (with self correction herever needed)	20	8
Reads less than 10% words correctly (with self correction wherever needed)	10	7

## Average Score in Decoding of Common, Isolated Words

(on a scale of 0 to 50)

## Decoding Non-Words

the ability to sound out non-words by identifying each symbol's (akshara or	The task was based on reading aloud 50 non-	
letter) sound	words.	ļ

On average students can read 29 non-words correctly.

## Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Reads 80% and more words correctly and fluently	41	62
Reads 50% to Less than 80% words correctly (with self correction wherever needed)	21	18
Reads 10% to less than 50% words correctly (with self correction wherever needed)	19	9
Reads less than 10% words correctly (with self correction wherever needed)	20	11

## Average Score in Decoding of a Non-word/Non-sense word (on a scale of 0 to 50)

Note: Decimal figures in the data set has been rounded up to whole numbers and hence may not add up to 100.

## Picture Matching

The ability to understand the meaning of written text

The task comprised of reading different texts (Comprising 1 sentence, 2 sentences and 3 sentences) and matching the content of each of the texts with the given pictures

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Reads and Comprehends four to five texts of varying lengths correctly	87	87

## Average Score on Picture Reading Comprehension (on a scale of 0 to 5)

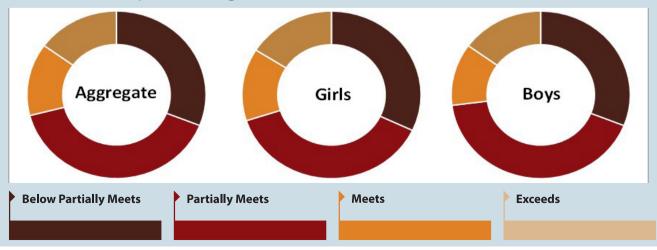

## Benchmark of ORF with Comprehension and Student Performance

Global Proficiency Levels		Below Partially Meets Global Minimum Proficiency	Partially Meets Global Minimum Proficiency	Meets Global Minimum Proficiency	Exceeds Global Minimum Proficiency
Definition		Learners lack the most basic knowledge and skills. As a result, they generally cannot complete the most basic grade-level tasks.	Learners have limited knowledge and skills. As a result, they can partially complete basic grade-level tasks.	Learners have developed sufficient knowledge and skill. As a result, they can successfully complete the most basic grade-level tasks.	Learners have developed superior knowledge and skill. As a result, they can complete complex grade-level tasks.
Benchmark		<b>0 - 14</b> correctly read words with comprehension in one minute.	<b>15 - 34</b> correctly read words with comprehension in one minute.	<b>35 - 53</b> correctly read words with comprehension in one minute.	<b>54 and above</b> correctly read words with comprehension in one minute.
Percentage	State/UT	31	40	14	15
of Students meeting the standard	National	17	29	21	33
Percentage of	State/UT	32	38	14	16
Girls meeting the standard	National	17	29	21	33
Percentage of	State/UT	31	42	12	15
Boys meeting the standard	National	16	30	21	33

## Distribution of Students by Global Proficiency Levels in the State/UT (In percentage)

Note: Decimal figures in the data set has been rounded up to whole numbers and hence may not add up to 100.

## Association of Background Variables with Literacy

The relationship between learning achievement of students and variables related to student's home background and school were analyzed by using different statistical technique. This chapter discusses the association of the different contextual variables with the achievements of the students.

#### 1. Association Results : Student Profile

The given section details the association results regarding various student related variables.

Literacy Sub Task	Difference between mean Scores	Sig.*
Oral Language Comprehension	0.44	0.53
Phonological Awareness	-0.05	-0.02
Decoding Letters	-2.91	-0.21
Decoding Words	2.39	0.14
Decoding Non-words	0.49	0.03
Picture Matching	0.47	0.40
Oral Reading Fluency (ORF)	2.25	0.11
ORF with Comprehension	0.82	0.45

A value of 0.2 represents a small effect size.
 A value of 0.5 represents a medium effect size.
 A value of 0.8 represents a large effect size.

#### Table 1.2: Attended pre-primary Classes/Anganwadi

Literacy Sub Task	Difference between mean Scores	Sig.*

# Foundational Numeracy

### **Foundational Numeracy**

Foundational Numeracy skills comprise of the ability to understand numbers, perform basic operations with numbers and apply the understanding of patterns and numbers in real life situations. In the Foundational Learning Study, foundational Numeracy has been assessed through different sub-task as explained below:

#### Subtasks Assessed in Foundational Numeracy

Subtask	Description of the subtask
Number identification	Identifying and reading aloud 24 distinct numbers presented in the form of a grid (up to 9999)
Number discrimination	Comparing 14 pairs of numbers to identify the bigger number
Number operation (addition and subtraction)	Completing 4 Addition and 4 Subtraction facts
Word problems (addition and subtraction)	Solving 6 word problems based on the operation of addition and subtraction
Number operations (Division and Multiplication)	Constructing and using 4 multiplication facts (tables) of numbers 2 to 10 and using 4 division fact.
Measurement	Solving 6 problems based on measurement and estimation of volume, length, time using standard and non-standard units
Fractions	Answering 6 problems based on identification and representation of fraction values of half, one-fourth, three-fourth of a whole and of a collection of 12 objects.
Patterns	Identifying and extending & patterns comprising of numbers and shapes
Data Handling	Reading simple display of data and answering 6 questions based on the data display.

•	Number Identification		
	The task was based on recognising and reading aloud numbers (up to 9999) .		On average students read 18 numbers correctly.
Percentage of Students			
	Descriptor	State Averag Performance (	
	Descriptor Reads numbers up to 9999		
		Performance (	%) Performance (%)
	Reads numbers up to 9999	Performance ( 60	%) Performance (%) 64

#### • Average Score in Number Identification (on a scale of 0 to 24)

•	Number Discrimination	(	
	The task comprised of comparing pairs of numbers to identify the bigger number.	st	On average sudents identified 12 numbers correctly.
•	Percentage of Students		
	Descriptor	State Average Performance (%	National Average ) Performance (%)
	Discriminates numbers up to 9999	68	67

Discriminates numbers up to 999	24	23
Discriminates numbers up to 99	8	8
Discriminates numbers only up to 9	1	2

#### • Average Score in Number Discrimination (on a scale of 0 to14)

#### • Number Operation (Addition and Subtraction)

The task was based on completing addition and subtraction facts.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)	<ul> <li>Percentage of Students Used</li> <li>Strategies to Solve the questions</li> </ul>		
Adds numbers upto 999	53	53		State Average Performance (%)	National Average Performance (%)
Adds numbers upto 99	69	71			
Adds numbers upto 9	87	92	Finger/tick marks	26	15
Subtracts numbers upto 999	38	40	Paper and pencil	64	77
Subtracts numbers upto 99	59	62			
Subtracts numbers upto 9	75	81	Mental calculation	9	8

#### Average Score in Number Operation (Addition and Subtraction) (on a scale of 0 to 8)

#### Number Operation (Word Problems)

The task was based on solving word problems based on the operation of addition and subtraction.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)	Strategies to Solve the Question		
Identifies the application of operation of addition in real life situations and provides the correct answer for questions based on addition only	58	54			National Average
Identifies the application of operation of subtraction in real life situations and provides the correct answer for questions based on subtraction only	42	42	Finger/tick marks	30	16
Identifies the application of number operations in real life situations and provides the correct answers for 80% and above questions	52	52	Paper and pencil Mental calculation	57 13	71 13

## Average Score in Number Operation (word problems) (on a scale of 0 to 6)

#### Number Operation (Multiplication)

The task was based on Constructing and using multiplication facts (tables) of numbers 2 to 10 and using division facts

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Understands and applies correct multiplication facts in 80% and above questions	75	71
Understands and applies correct multiplication facts in 50% and less than 80% questions	10	16
Understands and applies correct multiplication facts in less than 50% questions	9	6
Does not respond	6	8

## Average Score in Number Operation (Multiplication) (on a scale of 0 to 4)

Note: Decimal figures in the data set has been rounded up to whole numbers and hence may not add up to 100.

#### • Number Operation (Division)

The task was based on Constructing and using multiplication facts (tables) of numbers 2 to 10 and using division facts.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Understands and applies correct Division facts in 80% and above questions	70	49
Understands and applies correct Division facts in 50% and less than 80% questions	23	31
Understands and applies correct Division facts in less than 50% questions	3	6
Does not respond	4	14

### Average Score in Number Operation (Division) (on a scale of 0

to 4)

#### Measurement (Calendar Reading)

The task comprised of solving word problems based on measurement and estimation of volume, length and time using standard and non-standard units

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Identifies the Month, Date and Day on the Calender	65	62
Identifies the month, date and day with help	14	20
Make mistakes in identifying the Month, date and day	6	6
Dose not respond	15	12

#### Average Score in Measurement (Calendar Reading) (on a scale of 0 to 3)

#### Measurement (Volume)

The task comprised of solving word problems based on measurement and estimation of volume, length and time using standard and non-standard units

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Can compare and estimate the volume of different containers	55	46
Can either compare or estimate the volume of different containers	43	47
Attempts but makes mistakes in estimating and comparing the volume	1	3
Dose not respond	1	4

#### Average Score in Measurement (Volume) (on a scale of 0 to 3)

#### Measurement (Time on clock)

The task comprised of solving word problems based on measurement and estimation of volume, length and time using standard and non-standard units

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Tells the time correctly	45	52
Tells the time correctly with the help of hint	44	36
Dose not respond	12	12

#### Average Score in Measurement (Time on Clock) (on a scale of 0 to 3)

#### Measurement (Length)

The task comprised of solving word problems based on measurement and estimation of volume, length and time using standard and non-standard units

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Applies the understanding of measurement of length and calculates the length of the object	70	62
Applies the understanding of measurement of length but miscalculates the length of the object when the object is not aligned with the 0 of the scale	24	27
Makes effort but not able to calculate the length of the object	4	6
Dose not respond	1	4

#### Average Score in Measurement (Length) (on a scale of 0 to 3)

#### Fractions

The task was based on identifying and representing fraction values of half, one-fourth, three-fourth of a whole and in a collection of 12 objects.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
correctly identifies one-half	82	70
correctly identifies one-fourth	57	47
correctly identifies three-fourth	76	61
correctly identifies all the fractions (one-half, one-fourth, three-fourth)	54	42
correctly represents one-half	78	68
correctly represents one-fourth	74	55
correctly represents three-fourth	57	46
correctly represents all the fractions (one-half, one-fourth, three-fourth)	52	40

#### • Average Score in Fractions (on a scale of 0 to 6)

#### Pattern

The task comprised of identifying and extending patterns comprising of numbers and shapes.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Correctly identifies and completes patterns with shapes and numbers in 80% and above questions	71	61
Correctly identifies and completes patterns with shapes and numbers in 50% to less than 80% questions	23	28
Correctly identifies and completes patterns with shapes and numbers in less than 50% questions	5	8
Dose not respond	1	2

#### Average Score in Pattern (on a scale of 0 to 8)

#### Data Handling

The task was based on reading simple display of data and answering questions based on the data display. On average students answered 5 questions correctly based on data display.

#### Percentage of Students

Descriptor	State Average Performance (%)	National Average Performance (%)
Answers 80% and above questions correctly	79	70
Answers 50% - less than 80% questions correctly	18	23
Answers less than 50% questions correctly	2	5
Answers less than 50% questions correctly	0	2

#### • Average Score in Data Handing (on a scale of 0 to 6)

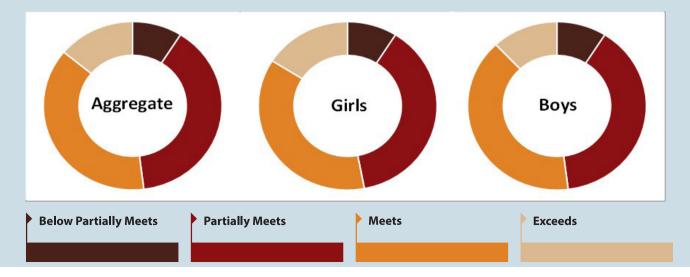

#### Benchmark of Numeracy and Student Performance

Global Proficienc	:y Levels	Below Partially Meets Global Minimum Proficiency	Partially Meets Global Minimum Proficiency	Meets Global Minimum Proficiency	Exceeds Global Minimum Proficiency
Definitio	n	Learners lack the most basic knowledge and skills. As a result, they generally cannot complete the most basic grade-level tasks.	Learners have limited knowledge and skills. As a result, they can partially complete basic grade-level tasks.	Learners have developed sufficient knowledge and skill. As a result, they can successfully complete the most basic grade-level tasks.	Learners have developed superior knowledge and skill. As a result, they can complete complex grade-level tasks.
Benchma	rk	<b>0 - 42</b> Score Points.	<b>43 - 69</b> Score Points	<b>70 - 83</b> Score Points	84 and above Score Points
Percentage of Students	State/UT	9	39	38	14
meeting the standard	National	11	37	42	10
Percentage of Girls meeting the	State/UT	9	38	37	16
standard	National	11	38	41	10
Percentage of Boys meeting the	State/UT	9	39	40	12
standard	National	11	36	43	10

#### Distribution of Students by Global Proficiency Levels in the State/UT (In percentage)

Note: Decimal figures in the data set has been rounded up to whole numbers and hence may not add up to 100.

### Association of Background Variables with Numeracy

The relationship between learning achievement of students and variables related to student's home background and school were analyzed by using different statistical technique. This chapter discusses the association of the different contextual variables with the achievements of the students.

Numeracy score is a combined score including all subtasks and has a scale of 0 to 86.

#### 1. Association Results : Student Profile

The given section details the association results regarding various student related variables.

Numeracy	Difference between mean score	Sig.*
Language spoken by students at home is the same as medium of instruction	0.57	0.11
Attended pre-primary Classes/Anganwadi	-0.17	-0.03
Ask questions in the class	0.21	0.04
Reads other materials in addition to textbooks	0.71	0.14
Playing Game	0.34	0.07
Story telling with family members	0.29	0.06
Playing Game with family members	0.14	0.03
Time taken to go to school upto 30 mins.	0.31	0.06
Time taken to go to school upto more than 30 mins.	-0.31	-0.06

\* A value of 0.2 represents a small effect size.

A value of 0.5 represents a medium effect size.

A value of 0.8 represents a large effect size.

#### 2. Association Results : Teacher Profile

The given section details the association results regarding various teacher related variables.

Numeracy	Difference between mean score	Sig.*
Teaching at Foundational stage : less than 3 years/more than 3 years	-0.38	-0.07
Attend any in-service workshop/Training to understand the learning needs and other developmental aspects in young children	0.47	0.09
Highest educational qualification upto Higher Secondary	0.12	0.02
Technique used in assessing students : Observation (Never and Sometimes Vs. Most of the times and Almost Always)	-0.10	-0.02
Technique used in assessing students : Class Test (Never and Sometimes Vs. Most of the times and Almost Always)	-0.52	-0.10
Technique used in assessing students : Group Activity (Never and Sometimes Vs. Most of the times and Almost Always)	-0.01	0.00
Technique used in assessing students : Peer Work (Never and Sometimes Vs. Most of the times and Almost Always)	0.21	0.04
Technique used in assessing students : Oral Work (Never and Sometimes Vs. Most of the times and Almost Always)	-0.28	-0.05
Maintain Teacher's Diary	-0.38	-0.07
Teacher's uses portfolio to assess the progress of the child	0.88	0.17
Time taken to go to school upto 30 mins.	0.03	0.01

A value of 0.2 represents a small effect size.
 A value of 0.5 represents a medium effect size.
 A value of 0.8 represents a large effect size.

#### 3. Association Results : School Profile

The given section details the information gathered about schools regarding various school related variables.

Numeracy	Difference between mean score	Sig.*
School Infrastructure: Electricity and proper lighting	6.06	1.17
School Infrastructure: Fully functional toilet for girls	0.15	0.03
School Infrastructure: Fully functional toilet for boys	-0.61	-0.12
School Infrastructure: Readily available medical room	0.16	0.03
School Infrastructure: Safe windows and openings for ventilation	-0.62	-0.12
School Facility: Basic Drinking Water	-0.62	-0.12
School Facility: Basic hand washing facility	6.06	1.17
School Facility: Mid-day meals to the child on daily basis	-0.31	-0.06
School Facility: Primary Health Services	-0.20	-0.04
School Facility: Accessible infrastructure for students with disabilities	0.36	0.07
Health checkup not being done	0.25	0.05
Classroom Equipment : Story Books	-0.09	-0.02
Classroom Equipment : Toys/ Play equipment	0.31	0.06
Classroom Equipment : Computers	-0.27	-0.05
Classroom Equipment : Internet access	-0.07	-0.01
Classroom Equipment : Textbooks/reading materials	6.06	1.17

\* A value of 0.2 represents a small effect size.
 A value of 0.5 represents a medium effect size.
 A value of 0.8 represents a large effect size.

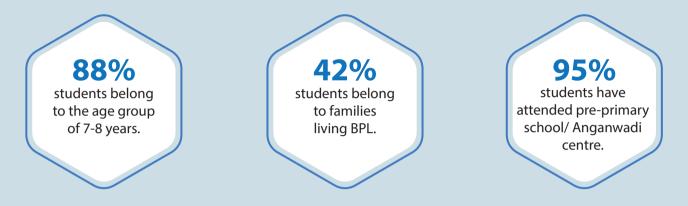

# Profiling of Backgrounds Variables

#### **Student Demographic Profile**

The FLS conducted on grade 3 students revealed that

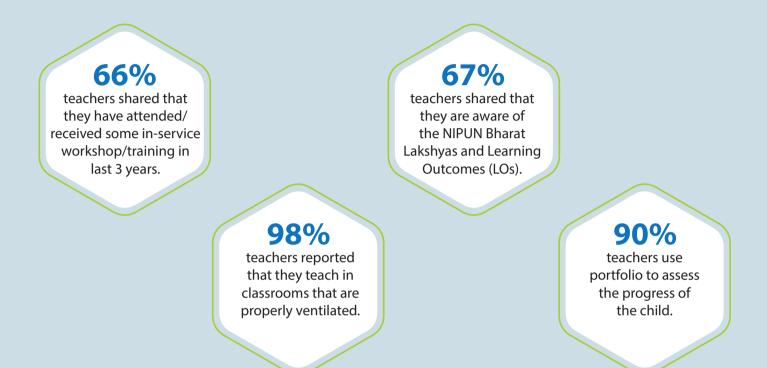

Activities that family members do	Percent	tage of Students	s (State)	Percentage of Students (National)			
with the children	Rarely	Rarely Sometimes		Rarely	Sometimes	Often	
Reading Books	37	42	21	24	55	21	
Playing with toys	33	44	23	28	54	18	
playing games	29	43	29	21	54	25	
Outdoor activities like picnic etc.	29	53	18	21	64	15	
Art and craft	36	50	14	30	56	14	
Oral story telling	34	46	20	23	57	20	

Activities children like to do	Percentage of Students (State)	Percentage of Students (National)
Art and Craft	94	91
Reading books (other than textbooks)	75	82
Playing with toys	87	85
Playing games	91	93
Exercise (Yoga etc.)	65	70
Looking after plants or/and animals	82	85

Mode of commuting to school	Percentage of Students (State)	Percentage of Students (National)
On foot	33	55
Bicycle	6	8
Public Transport (Bus/Train/Metro)	5	7
School provides transport	10	9
Own transport Two/three-wheeler	44	18
Own transport Four-wheeler	2	3

#### **Teacher Demographic and Professional Profile**

Infrastructure and resource used by	Percentage of Teachers (State)				Percentage of Teachers (National)			
the teacher	Never	Once a week	Everyday	Not Available	Never	Once a week	Everyday	Not Available
Spacious classrooms	1	16	80	2	3	17	73	7
Classroom with access to additional space	2	55	41	2	6	48	37	9
Space in Veranda/Corridor	16	65	16	2	17	46	27	10
Library	12	81	6	1	14	60	15	12
Hall	25	51	9	16	18	45	16	21
